

Najah Smith

Senior Software Engineer Test

(504) 906-3890 | najahssmith@gmail.com | linkedin.com/in/najah-smith/

PROFESSIONAL SUMMARY

Senior Automation Test Engineer with 8+ years of experience designing, developing, and maintaining automated testing frameworks for web applications and RESTful API services. Strong expertise in Selenium, C#, Python, CI/CD pipelines, cloud platforms, and Agile methodologies. Proven track record of increasing automation coverage, reducing regression time, and leading cross-functional QA initiatives.

TECHNICAL SKILLS

- **Automation Tools:** Selenium WebDriver, Playwright, TestNG, Cucumber
- **Programming Languages:** C#, Java, Python
- **CI/CD:** Jenkins, GitHub Actions
- **Cloud & DevOps:** AWS, Docker, GCP
- **Testing Types:** Functional, Regression, Smoke, API, Performance, Localization
- **API Tools:** Postman
- **Version Control:** Git, GitHub, Bitbucket
- **Methodologies:** Agile, Scrum, Shift-Left Testing
- **Test Management:** Jira, X-Ray, TestRail

PROFESSIONAL EXPERIENCE

Software Engineer Test | Dec 2019 – Present

BlackLine – Los Angeles, CA

- Designed and implemented a scalable and localization-ready automation testing framework using Selenium and C# to improve automated test coverage from 20% to 80%.
- Reduced regression execution time by 50% through parallel execution using Selenium grid and by automating common workflows, such as transaction creation, invoice generation, and journals creation.
- Integrated automated tests into CI/CD pipelines using Jenkins and GitHub Actions to automate QA build and release sign offs.
- Collaborated with AppSec teams to integrate application security into the test suite by automating SQLi and XSS scenarios, allowing security vulnerabilities to be detected early in the development lifecycle.
- Collaborated with development, product, and customer success teams to create detailed test plans, test cases, and triage application bugs.

- Mentored offshore QA and Dev engineers through training sessions, code reviews, and knowledge-sharing.

Software Engineer in Test | Jun 2018 – Dec 2019

Accruent – New Orleans, LA

- Developed and maintained UI automation scripts using Selenium WebDriver and Python.
- Executed performance testing with NeoLoad to assess system stability and response times.
- Authored detailed test plans and test cases for web applications and RESTful APIs.
- Logged and tracked defects in Jira with clear reproduction steps and impact analysis.
- Participated in sprint planning, defect triage, and release readiness activities.
- Utilized CI/CD tools to build, deploy, and validate feature code across QA environments.

Associate Software Engineer | Jun 2016 – Jun 2018

CA Technologies – San Jose, CA

- Designed and executed test plans for UI dashboards, metric visualization, and alerting features.
- Performed end-to-end testing across WebLogic, JBoss, Tomcat, and .NET servers.
- Deployed and maintained Java, .NET, Node.js, and PHP agents in QA and Dev environments.
- Collaborated with cross-functional teams to investigate missing metrics, connectivity issues, and dashboard defects.

Research Assistant | May 2015

University of North Carolina – Charlotte, NC

- Contributed to research using Microsoft Smart Bands to detect and classify human social gestures.
- Analyzed and labeled accelerometer datasets for machine-learning model development.

EDUCATION

Bachelor of Science in Computer Science | Jun 2013 – May 2016

Dillard University – New Orleans, LA
